Visual studio 설치 마법사에서 수정 단추를 선택하십시오. 설치할 선택적 기능 목록에서 HTML / JavaScript (Apache Cordova) 확인란을 선택하고 다음 버튼을 선택한 다음 업데이트 버튼을 선택하십시오. PDF - Download Cordova free title:비주얼 스튜디오 아파치 코도바 (Apache Cordova),source: blogName:후-우우욱...,blogId:jeonghane,logNo:220529341238, smartEditorVersion:2,meDisplay:true,lineDisplay:true,outsideDisplay:true,cafeDisplay:true,blogDisplay:true' Hi, friends. Today we are going to learn how to develop mobile applications using Visual Studio (Apache Cordova) to install Visual Studio 2015 on a local machine. Create a new project in the workspace. Choose an empty app and save it in the machine's workspace. Then, once it's saved, you'll see the following screen: Click www, then index.html, where you can create your own mobile app with HTML code. Then start the app. You'll see the next screen: That's it - here's your mobile app. You can make it more appealing by adding CSS style to your solutions. Now on how to deploy it on your car. Install a mobile app on Android Device go into solution release mode and select the Android option. Now, build a solution. Once it builds, successfully, go to the solution folder - bin, Android, and then release. Here you can see the unsigned APK file. Now our next step is to change this APK file from unsigned to signed. To do this, we must launch some team in the CD. Open Run, cmd, then run as an administrator. Go to this catalog: Just enter the key to view all the commands. Then run the next syntax to create the key: keytool-genkey-v-keystore,lt;keystoreName.keystore,q Keystore aliasname'-gt;alias-keyalg-keysize-validity, then he'll ask you to fill the lt.-key size. After finishing all the details, automatically. The KEY file generates an uncertain path. Now go to the build.json file in your solution and key in all the valid key details and save and then build. In bin/android/release/ you can see the signed .apk file. Copy it on your mobile phone and install it. Try this method to improve your skills in developing Apache Cordova mobile apps with Visual Studio 2015. Hi, How can I make a GET/POST/PUT request using Javascript/J'Y/AJAX for existing MS S'L DB. Any help would be appreciated. Best wishes. How can we communicate with the database using Apache cordova's app compared to 2015? Can we call any web service in Apache cordova? I've never heard of Nathif. Thank you. It was a typo of translation, the real word was Native. Thank you for your it will be fixed soon. Really nice man.please check the spelling before you send it! If you were more specific, I think I could fix it now. Thanks for your very constructive comment. it's just a few I've noticed. professional. extreme. functional. and keystore-gt: resources. Thank you for this feedback. The new version is waiting for approval. Interesting review - My No 5 Information and not too long. Mislim, Dakle Geo Sam. Is this emulator going to be available in Express and the free edition of Visual Studio 2015? If you're talking about the Visual Studio Emulator for Android, I'm not sure about it, but it should be available in the next 2015 Community Edition (as is only available for the 2015 Preview at the moment). A very interesting review about Visual Studio 2015 and Cordova!
